

## Soundboard ONE

### JMC Soundboard - The Loudspeaker Made of Tone Wood

#### Experiencing Music in its Original Dimension

The Soundboard creates a balance, lively and pervasive musical climate, like that of a concert. The association of 350 year-old resonance spruce, time-honoured lutherie techniques and contemporary audio technology has given rise to a truly exceptional loudspeaker. The JMC Soundboard recaptures the original dimension of music and adorns your interior both as a musical instrument and as a work of art.

**The JMC Acoustic Docking Station** is a base or stand inspired by stringed instrument-making techniques to amplify and enhance the harmony of portable music produced by a smartphone or another small-sized source. The object is made out of resonance spruce from the Risoud Forest, world-renowned for its excellent responsiveness to vibrations. It is delivered in a box with 4 extra foam pads to ensure it can adapt to almost any Smartphone.

Dimensions (WxHxD): 28 x 4.5front/2.5back x 11 cm  
no electronic parts included - wood only
